

KMBR Architects Planners Inc. is pleased to congratulate St. Helen's School on the opening of their new West Wing.

Opening of the school's new West Wing signifies the completion of the first phase of a two phase rebuild of the existing school. The new wing provides four classrooms, a learning assistance room, a meeting room, breakout spaces, washrooms and a small office on the main floor which allows supervision of the three entry points into the wing. St. Helen's is committed to fostering a collaborative, 21st Century Learning environment with a focus on differentiated and project based learning. Both phases provide learning spaces which enhance the school's pedagogy and support further integration of technology, as the use of Wi-Fi, iPads and smart boards are already part of the school's daily approach. St. Helen's is a Catholic parish school located in Burnaby, BC.

KMBR has a passion for education and learning environments.

Our school designs help learners and educators collaborate, innovate and experience the tangible results of inspired learning environments. We focus on providing a variety of flexible and adaptable learning spaces which enhance the delivery of the BC Ministry of Education's "Education Plan" and respect our clients' budgetary and schedule constraints. **For more information: education.kmbr.com**
