About KMBR

Contact Us

KMBR looks at schools with 21st Century eyes and responds by delivering school design innovation built on the foundation of experience. Our school designs help learners and educators collaborate, innovate and experience the tangible results of inspired learning in a healthy learning environment.

KMBR has a clear understanding and is on the leading edge of translating the requirements of 21st Century pedagogies to the built environment. Our school designs focus on providing a variety of flexible and adaptable learning spaces - learning spaces which support many modes of learning, enhance student outcomes and the delivery of the BC Ministry of Education's "Education Plan" (Personalized Learning).

KMBR now offers a full day, 21st Century Learning workshop. Designed specifically to help BC school district and facilities teams understand, support and implement BC's Education Plan, our workshop "**21st Century Learning; Personalizing Learning In the Built Environment**", is available to all SD staff, leadership, trustees, and educators. For further information or to book please contact Gregg Brown or Marie Bednash.

About KMBR

Contact Us

Having worked with over 40 school districts, and having one of the largest K-12 portfolios in Canada, KMBR brings your project extensive knowledge of educational facility planning. Our experience and relationships have allowed us to develop a unique set of strategies for helping you acquire an innovative, efficient 21st Century School or addition, while meeting ministry standards, funding, design, project delivery and construction requirements.

KMBR is a strong advocate for both our clients and school planning excellence. We have current success in projects that incorporate Neighbourhood Learning Centres, joint-use agreements, Personalised Learning (the Ministry's "Education Plan"/21st Century Learning), and LEED Gold solutions. We have deep experience with seismic projects, phasing and projects requiring continued operation during construction.

We offer expertise, excellent service and the ability to fast-track your PIR/PDR. We want to help you move confidently forward to the next step of your capital project. Get started today - contact Gregg Brown, Witmar Abele or Marie Bednash for more information.

About KMBR

Contact Us

Mark Hamilton, Architect AIBC, AAA, MRAIC,
LEED® AP BD+C, NCARB, **Principal**

KMBR is very pleased to congratulate Mark on becoming a Principal of KMBR. Our existing three Principals have worked together for more than 25 years, but Mark is no stranger to this team as he has been friends with Gregg Brown since University! In addition to 25 years of architectural experience Mark brings depth in LEED certified post-secondary education projects and a passion for excellence in design with a focus on an integration of Architecture and Structural Engineering. Bassem Tawfik, Architect AIBC, AAA, SAA, LEED®
AP BD+C, **Senior Architect**

Bassem recently joined KMBR from Omicron Vancouver. As Senior Architect with KMBR his role is leading projects from concept to completion and developing and managing client relationships. Bassem's recent project experience includes Justice and corrections facilities, schools, and commercial projects.
